

Do you remember when the first fish ate your dry fly? You saw that fish suddenly materialize, open its big white mouth, and eat your dry fly! In that astounding moment the world stood still and there was only you, a dry fly, and a fish. It was magic—like an out-of-body experience and you were somehow a spectator suspended above the water overseeing the event. You were shocked, enthralled, and utterly impressed. For days that rising fish kept replaying in your mind. If you are like many anglers, you will remember that first rising fish for the rest of your life. You were captured by the rise of a trout exactly like you should have been. That rise is a treasure coveted by all who wield a fly rod. It is the single most exhilarating moment in fly fishing and it may be the ultimate experience in all of sport. Period!

For over 50-plus years Nate Brumley has been addicted to the rise of a trout. In that time he has never fished a nymph or streamer. He fishes a dry fly exclusively in all seasons of the year over all bodies of water. Please note: Nate would never disrespect the fact that you nymph or streamer fish; but when you fish a dry fly, he'd like to enhance that experience. And if you enjoy dry fly fishing, he can show you methods to keep a dry fly on much more often. Nate catches feeding fish in the hatch and continues to catch them when there are no rising fish at all. He doesn't play dry fly by the rules—he plays to service his addiction, and that is to make another fish rise and eat a dry fly! Nate has acquired a lifetime of spectacular knowledge focused on one thing—catching fish on a DRY FLY. The contents of this book will rock your fly fishing world with just a dry fly.
